

Top Physicians in TEXAS

Khawaja Azimuddin MD, FASCRS

Dr. Khawaja Azimuddin is an expert in the treatment of diseases of Colon, Rectum and Anus. He is committed to provide you with the highest quality of care in the field of Colon & Rectal Surgery in Houston and surrounding areas.

Dr. Azimuddin is a pioneer in minimally invasive, Laparoscopic and Robotic colon-rectal surgery. During this type of surgery, he makes a series of small incisions in the abdomen and uses a camera or a robot to remove portions of the diseased colon. This surgical technique can be used to treat colon cancer, polyps, ulcerative colitis, and diverticulitis. This is the least invasive form of surgery and has proven benefits when compared to traditional surgery that uses large incisions on the abdomen. Patients undergoing laparoscopic surgery experience less pain and their recovery is faster.

When it comes to the treatment of Hemorrhoids and other anorectal problems, Dr. Azimuddin literally wrote the Book! He is the co-author of the second edition of the textbook "Surgical Treatment of Hemorrhoids". This book, printed by Springer, UK, is used as a reference guide by doctors all over the world when treating hemorrhoids. Under the directorship of Dr. Azimuddin, The Hemorrhoid Center® offers state of the art treatment for hemorrhoids and other ailments of the anus and rectum.
